Chemical Compatibility Table

Chemicals from A to Z

The following list includes most frequently used chemicals. It provides useful information for the safe and adequate use of the Dispenser. However, safety precautions and recommendations in operating instructions must be followed carefully.

Code explanations

A = Good resistance

B = Acceptable with limitations

C= Not recommended

- 1 = Acid vapours (better resistance with lower concentration).
 Rinse the instrument in the rinse mode otherwise do not leave instrument on bottle.
- 2 = Risk of damage, softening or discoloration of external parts through vapours.
 - Rinse the instrument in the rinse mode otherwise do not leave instrument on bottle.
- 3 = Reactivity with high purity ceramic valve system components.
