# Company Profile

Microlit, a globally renowned leader in laboratory equipment and precision liquid handling solutions, has long been at the forefront of innovation. With a rich history of pioneering advancements in pipettes, dispensers and other laboratory instruments, Microlit has consistently pushed the boundaries of scientific excellence with **8000+ customers in 95+ countries**. Drawing upon decades of expertise and a deep understanding of the needs and challenges faced by researchers and technicians, we identified a critical gap in the market – **the need for high-quality, reliable and cost-effective laboratory consumables**. With a commitment to excellence and a passion for advancement, Microlit is thrilled to introduce our wide range of Lab Peristaltic Pumps, further expanding our portfolio in fluid handling solutions – combining performance, durability, and cost-efficiency for a variety of scientific and industrial applications.

ISO 9001 Certificate

ISO 13485 Certificate

CE Certificate of Peristaltic Pump

ISO 17025 (NABL) Certificate

ISO 14001 Certificate for Environmental Management Systems

ATEX Certificate of Peristaltic Pump

# Scope of Applications

Laboratory peristaltic pumps are highly versatile and contamination-free fluid transfer solutions used across a wide array of scientific disciplines. Their gentle, accurate and programmable fluid handling makes them ideal for the following:

## Analytical & Research Laboratories

Precision reagent dispensing  
Sample filtration and circulation  
Cell culture media circulation  
Buffer solution transfer  
Chromatography feed (HPLC, FPLC)

## Pharmaceutical R&D

Solvent and API transfer (non-reactive)  
Controlled drug delivery simulations  
GMP-compliant fluid transfer  
Dosing systems in formulation labs  
Sterile filtration processes

## Chemical & Materials Science Labs

Handling aggressive or corrosive fluids  
Lab-scale chemical dosing  
Monomer and catalyst feed in polymerization  
Process simulation setups

## Food & Beverage Quality Testing

Flavor or additive injection in sample batches  
Sample transfer without contamination  
Fluid delivery for microbial testing  
Dosing of flavorings, additives, and colorants

## Medical & Healthcare

Infusion and IV delivery systems (accurate dosing of medications, nutrients, and fluids)  
Dialysis machines (blood handling without contamination)  
Enteral feeding pumps  
Drug dispensing and sampling in labs and hospitals  
Handling of sensitive or sterile fluids

## Diagnostics & Healthcare R&D

Automated pipetting systems  
Diagnostic cartridge filling  
Blood/plasma sample movement  
Liquid handling in point-of-care devices

## Life Sciences & Biotechnology

DNA/RNA extraction workflows  
Cell culture and fermentation systems  
Bioreactor feed/harvest control  
PCR reagent transfer  
Protein purification loops  
Vaccine development (batch and R&D scale)

# Speed Variable Peristaltic Pump

MP110B | MP310B | MP610B (ABS Engineering Plastic Housing)

## MP110B

Flow Rate : 0.00011-750 ml/min  
Speed Rate : 0.1~150RPM  
Driver Weight : 3.6kg  
Power Consumption : <30W

## MP310B

Flow Rate : 0.005-1750 ml/min  
Speed Rate : 0.1~350RPM  
Driver Weight : 3.9kg  
Power Consumption : <40W

## MP610B

Flow Rate : 0.005-3000 ml/min  
Speed Rate : 0.1~600RPM  
Driver Weight : 3.9kg  
Power Consumption : <50W

Quick Tube Change      Stainless Steel Rotors      Moderate Pulsation

## Functions & Features:

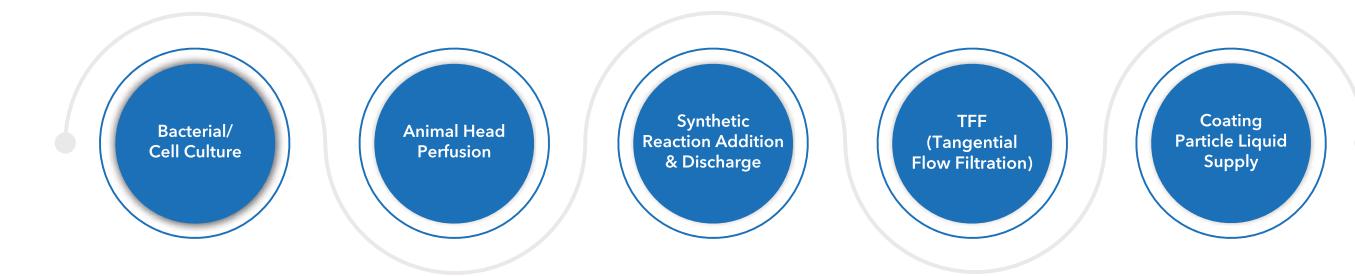

- LCD display with simple parameter settings and **intuitive status display**.
- Remote control capabilities through built-in software, **enabling start/stop functions, speed regulation**, timed operation, and monitoring features such as shutdown alarms and pump tube replacement reminders (optional).
- Delay start and delay stop functions.
- Control options include **start/stop, reversible direction, full speed, speed adjustment, and state memory** (power-down memory).
- External analog speed regulation, along with external control signals for start/stop, forward/reverse operation, and physical isolation of the external control signal.
- Supports wide voltage input rate (5-24V) for external control signals.
- The external speed control signal type (voltage or current) can be switched via the control panel.
- **RS485 communication** interface with MODBUS protocol support, allowing for easy integration with other equipment and communication parameter settings.
- The circuit board is coated with conformal material, providing dust and moisture protection.
- Super anti-interference features and a wide input voltage rate make it suitable for complex power environments.
- **ABS engineering plastic housing** with a creative streamlined design that is both aesthetically pleasing and functional.
- **Time dispensing function**, enabling repeated, timed, and quantitative dispensing.
- Provides high cost-performance by meeting basic transmission requirements with speed adjustment and timed dispensing capabilities.

\*Note: The appearance of actual peristaltic pump and its pump head may vary from the displayed picture.

## Technical Specifications:

Speed Resolution	0.1RPM (speed ≤ 100 RPM) / 1RPM (speed > 100RPM)
Speed Accuracy	( $\pm$ ) 0.5%
Duration	0.1~999 S/Min/H/D
Dispensing Interval Time	0.1~999 S/Min/H/D
Dispensing Time	1~999, "0" Infinite loops
External Control	External control input level 5V, 12V (Standard), 24V (Optional), External control analog 0-5V (Standard), 0-10V, 4-20mA (Optional)
Working Environment	Temperature 0~40°C, relative humidity < 80%
IP Grade	IP31
Dimension (L×W×H)	284mm × 180mm × 197mm

## Application Areas:

Stainless Steel Rotors

Moderate Pulsation

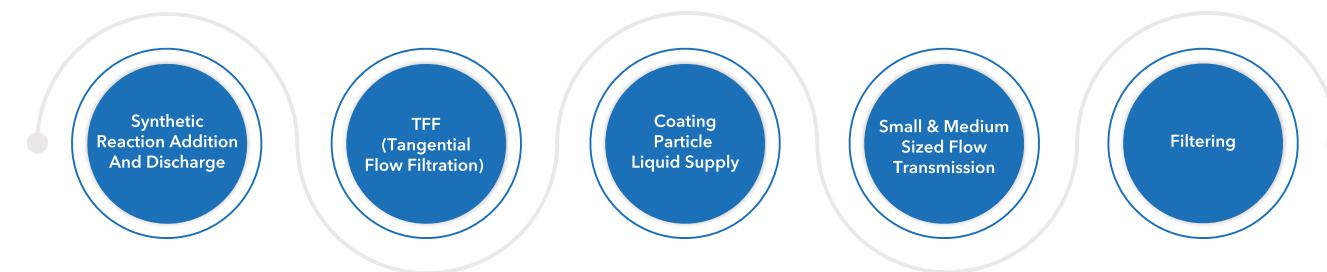

## Functions & Features:

- LCD display with simple parameter settings and **intuitive status display**.
- Equipped with a **high-quality, high-torque stepper motor drive** for precise speed control, a wide operational rate, stable performance, and high-accuracy flow transmission.
- Features include **start/stop functions, speed adjustment, reversible direction, full speed, and state memory** (power-down memory).
- The running time, interval time, and cycle times can be set to meet requirements for timing, quantitative liquid dispensing, and flow testing.
- Slow stop and suction feature effectively prevents liquid dripping when the machine stops.
- **Keyboard lock function** helps prevent accidental operation.
- Internal **double-layer isolation design** and specially protected circuitry offer enhanced dust, moisture, corrosion and oxidation resistance.
- Exceptional anti-interference capability and wide voltage design make it suitable for complex power supply environments.
- The **RS485 communication** interface with MODBUS protocol ensures easy connectivity with a variety of control devices.
- It can be equipped with optional accessories such as a foot switch, hand dispenser among others.
- The **304 Stainless Steel shell** is easy to clean and effectively prevents corrosion from various organic solvents.
- High-precision speed control meets essential transmission requirements with broad applicability.
- **WiFi control** allows remote operation via the app, with monitoring features such as shutdown alarm and pump tube replacement reminders.

## Technical Specifications:

Speed Resolution	0.1RPM (speed ≤ 100 RPM) / 1RPM (speed > 100RPM)

## MP610C

Flow Rate : 0.005- 3000 ml/min  
Speed Rate : 0.1~600 RPM  
Driver Weight : 3.9kg  
Power Consumption : <50W

Quick Tube Change      Stainless Steel Rotors      Moderate Pulsation

## Functions & Features:

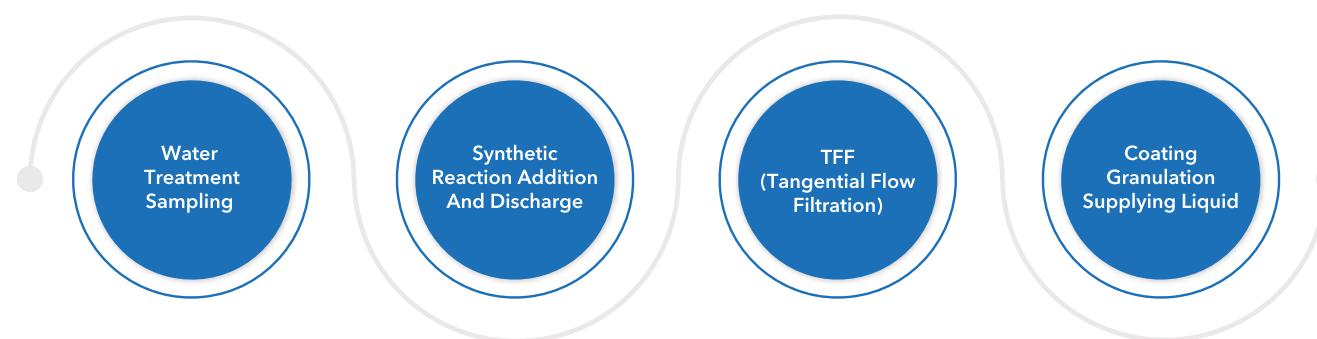

- Color LCD display with both **touch screen** and keypad for user-friendly operation.
- LF-Touch-OS software system** delivers efficiency, stability, and an intuitive human-machine interface, allowing for easy customization and upgrades.
- Offers functions such as **start/stop**, **reversible direction**, **full speed**, **adjustable speed**, and **state memory** (power-down memory).
- Precise speed resolution of 0.1RPM.
- Flow calibration function** ensures operational accuracy.
- Easy dispensing function enables **repeatable**, **timed quantitative dispensing** without an external timer.
- RS485 interface** with MODBUS protocol allows seamless integration with other equipment.
- ABS engineering plastic housing** with a sleek, streamlined design.

- Double-deck isolation design and conformal-coated circuit board provide resistance to dust and moisture.
- High anti-interference capability and broad input voltage range make it adaptable to complex power environments.
- Capable of driving multiple channels and compatible with various pump heads.
- Intelligent temperature control** reduces noise, achieving a super-quiet operation at 45 decibels.

## Technical Specifications:

Speed Resolution	0.1RPM
Speed Accuracy	( $\pm$ ) 0.2%
Power Supply	AC 100~240V, 50Hz/60Hz

## Functions & Features:

- 4.3-inch color LCD display with a wide viewing angle for clear visuals.
- Touchscreen paired with keypad operation provides an **intuitive user experience**.
- LF-Touch-OS software system** ensures efficiency and stability, offering an intuitive human-machine interaction mode that supports easy product customization and upgrades.
- Standard functions include **start/stop, reversible direction, full speed, back suction, and state memory**, with direct input for flow or speed parameters.
- Precise flow control and display, utilizing a micro-step algorithm for accurate dispensing across various settings.
- Wizard-style flow calibration** feature for easy and accurate setup.
- Unique back suction function effectively prevents liquid dripping.
- Intelligent temperature control function** adjusts heat dissipation according to the environment, optimizing equipment performance.
- Supports external analog speed control and external signals for start-stop, reversible direction, and dispensing, with physical isolation for external controls.
- RS485 communication** with MODBUS protocol, supporting up to 80 programming instructions for easy integration with other control devices.
- Exceptional anti-interference capabilities and wide voltage design make it suitable for complex power environments.
- Timed dosing** with options for scheduled start and stop.

Stainless Steel Rotors

Moderate Pulsation

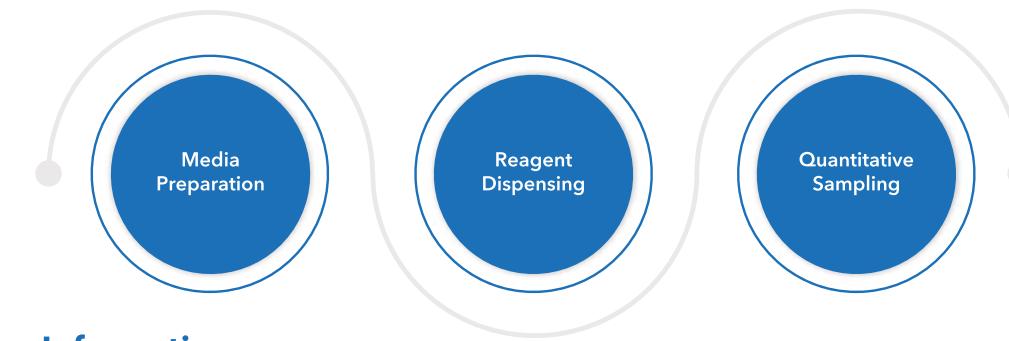

## Functions & Features:

- Color LCD display with touch screen and keypad for easy operation.
- LF-Touch-OS software system is efficient and stable, providing a user-friendly interface for convenient product customization and upgrades.
- Offers four working modes: flow rate dispensing mode, volume dispensing mode, time dispensing mode, and program (transfer) dispensing mode.
- Automatically stores up to five sets of working parameters.
- Advanced control technology for motor rotation angle enhances dispensing accuracy, compared to traditional time dispensing methods affected by factors like motor start delay.
- Supports start/stop, reversible direction, full speed, speed adjustment, and state memory (power-down memory).
- Speed resolution of 0.1 RPM.
- Calibration function for precise dispensing.
- Expert operating system guides users in setting parameters correctly.
- Intelligent temperature-control technology reduces operating noise.
- External high-low electrical signals control start/stop, reversible direction, and dispensing functions, with an optically coupled isolator and external analog input for speed adjustment.
- RS485 communication interface with MODBUS protocol, allowing easy connection to other devices.
- Internal double-layer isolation design and conformal-coated circuit board provide dust and moisture resistance.
- High anti-interference capability and wide input voltage range, suitable for complex power environments.
- ABS engineering plastic housing with a streamlined, attractive appearance.
- Connectable to foot switch for start-stop control of dispensing volume.
- Multiple dispensing modes with precise dispensing.

## Technical Specifications:

Speed Resolution	0.1RPM

# Accessories

# Hand Dispenser

MP - HD

The hand dispenser is equipped with Microlit MP-HD series filling needles, **making it ideal for manual and semi-automatic dispensing** with a peristaltic pump. It features a comfortable grip, compact size, and lightweight design.

**Dimensions:**  
**ID≤8mm, wall thickness≤2.4mm**

# Footswitch

MP - FS

Designed to work with Microlit's full range of products, the footswitch controls the start and stop of the pump. It features a **light-touch front-step design** for clear feedback and anti-fatigue use.

**Dimensions:**  
**103x72x25mm**

**IP grade:**  
**IP54**

# Silicone Tubing

Silicone Tubing is made of silicone rubber material and processed by platinum vulcanization process, high cleanliness, excellent elasticity and abrasion resistance, it is a high-quality peristaltic pump tube and transmission tube. It is widely used in pharmaceutical, bioengineering, fine chemical, food, medical and other fields.

Pump Head	Tube Size	Flow rate (ml/min at Max RPM (600)	Tube ID (mm)	Wall Thickness (mm)
PH15T	13#	41	0.8	1.6
	14#	58.5	1.6	1.6
	19#	331.1	2.4	1.6
	16#	572.5	3.1	1.6
	25#	1201.6	4.8	1.6
	17#	1728.5	6.4	1.6
PH25	18#	2479.1	7.9	1.6
	114#	144	1.6	2.4
	116#	486	3.1	2.4
	15#	1098	4.8	2.4
	24#	1860	6.4	2.4
	35#	2340	7.9	2.4
	36#	3000	9.6	2.4

Note: The default tube size is approx. 2 meters in length.

## Benefits of Using Silicone Tubing in Peristaltic Pumps

- High Flexibility & Elasticity  
Silicone withstands repeated squeezing without deforming, giving long service life in peristaltic pumps.
- Wide Temperature Range  
Operates reliably from about -50°C to +200°C, suitable for hot or cold fluid transfer.
- Excellent Biocompatibility  
Non-toxic, non-leaching and compliant with medical/food standards—ideal for pharma & food applications.
- Good Chemical Resistance  
Handles water, mild acids/alkalis and many biological fluids without degrading.
- Smooth, Clean, and Transparent  
Its smooth bore reduces contamination, is easy to clean and allows visual monitoring of flow.
- Sterilization-Friendly  
Compatible with autoclaving, EtO and gamma sterilization methods.
- Low Odour and Taste  
Does not affect flavor—useful for food and beverage systems.
- Inert and Non-reactive  
Maintains fluid purity and prevents interactions with sensitive samples.

# Pump Head

PH15T

Quick Tube Change

Stainless Steel Rotors

Moderate Pulsation

## Functions & Features:

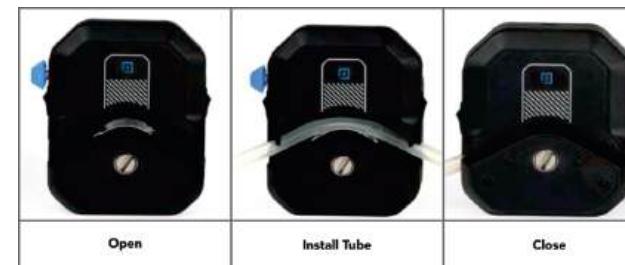

- Enhanced Exterior Design**  
The PH15T pump head now features a rear cover design to improve product integrity. It has a sleek, elegant appearance, with more dynamic curved lines. An independent small faceplate has also been added to the rear cover for a more standardized product design.
- Adjustable Pressure Tube Gap for Improved Versatility**  
The pump head is equipped with an adjustable pressure tube gap, which can be modified by turning the screws on top of the pump head. This allows the pump head to be compatible with tubes of various specifications, enhancing pressure application, improving versatility, and extending the tube's service life.
- Innovative Tube Clamp Linkage Mechanism for Easier Installation**  
A new tube clamp linkage mechanism retracts the tube clamp inward when the pressure block is opened, allowing for simultaneous opening of both the pressure block and the tube clamp. This feature simplifies tube installation, reduces operational difficulty, and increases work efficiency. This patented design is registered.
- Adaptive Clamping Mechanism:**  
Automatically accommodates tubes of different inner diameters without manual adjustments, making the product easier to use.
- Classic Pump Head Opening Method:**  
Allows quick tube replacement within seconds, significantly enhancing product efficiency and user convenience.
- PPS Material Casing:**  
The casing is made from PPS material, known for its resistance to organic solvents and other corrosive liquids, greatly boosting the product's durability and corrosion resistance.
- Stainless Steel Rollers:**  
These rollers are designed for high-strength usage at high speeds and for extended periods, ensuring long service life for the pump head.
- Multi-Channel Support:**  
The pump head supports the cascading of multiple heads and can be expanded to handle up to 10 channels.

**Note:** When connecting two pump heads in series, the rollers are staggered at a 60° angle to effectively reduce fluid pulsation and enhance transmission speed.

## Technical Specifications:

Flow Rate	≤2400ml/min
Channel	1
Roller	3/6 rollers
Speed Range	0.1~100 RPM/min
Tubing Method	Fixation of pump head tube clamp
Pressure Tube Clearance	Automatic/ manual adjustment
Dimension	95.7 x 108.7 x 63.1 mm
Working Environment	Temperature 0 ~40°C, relative humidity <80%
Bear Liquid Temperature	Within 200°C
Corrosion Resistance	Resistant to most acid, alkali, salt liquids and organic solvents.

18#	7.9	130	243.5	433.3	1299.9	2817.8

Note: The above flow data are all obtained from the transfer of pure water under normal temperature and pressure conditions in the Microlit lab.

# Pump Head

PH25

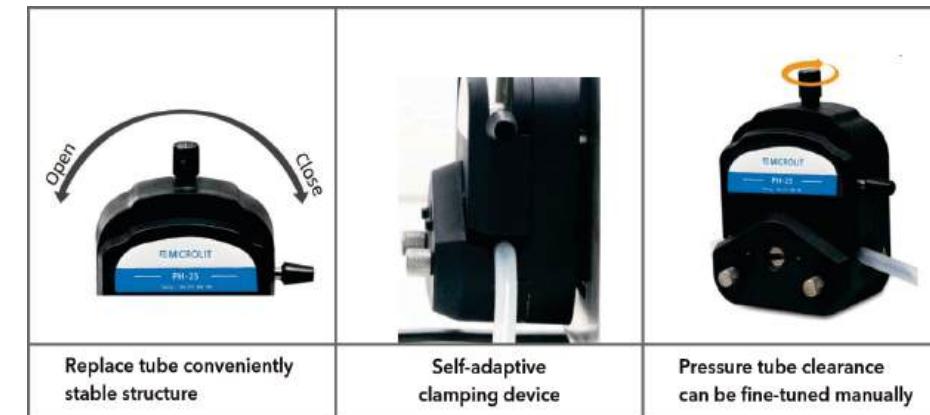

## Functions & Features:

- The PH25 pump head offers a flow range of 0.024 to 3000 ml/min and is compatible with tube sizes 114#, 116#, 15#, 24#, 35#, and 36#.
- It's ideal for transporting more viscous liquids and meets the demands of a larger suction range, head, and outlet pressure.
- Equipped with a self-adjusting clamping device, it easily accommodates tubes of varying thickness without manual adjustment.
- Features a classic pump tube locking mechanism, allowing tube replacement in seconds and making it easy to handle frequent tube changes.
- Special tube pressure design reduces pump tube wear and minimizes the risk of accidental rupture from misuse.
- Tube clearance can be fine-tuned manually, allowing greater pressure capacity by reducing tube clearance, or extending tube life by increasing it. It also adapts to slight variations in tube processing accuracy.
- The shell is made of PPS high-performance plastic, with four stainless steel rollers to support high-speed, long-duration operations while minimizing transmission pulsation.
- Multiple pump heads can be stacked, with a maximum expansion of up to 4 channels.
- When two pump heads are connected in series, the rollers are offset by 45 degrees, significantly reducing fluid pulsation and increasing transmission speed.
- The PH25 pump heads is compatible with various motors, including Stepper, Servo, AC, DC, and others.

## Technical Specifications:

Flow Rate	0.024~3000ml/min
Channel	1
Roller	4
Tubing Method	Whole tube
Shell Material	PPS
Pressure Tube Clearance	Adjustable
Working Environment	Within 200°C
Weight	620g
Corrosion Resistance	PPS is resistant to most acid, alkali, salt liquids and organic solvents.

# Pump Head

PH15-24 | PH15-44 | PH10-28

Quick Tube Change

Stainless Steel Rotors

Moderate Pulsation

## Functions & Features:

- The PH series pump head is designed for **small to medium flow, multi-channel fluid transmission**, and is available in two versions, the PH10 and PH15, based on tubing size.
- PH10 pump head: **Offers a single-channel flow** range of 0.00023 to 64 ml/min, compatible with tubing sizes 13# and 14#, with an inner diameter of 0.13 to 3.2 mm and a wall thickness of 0.8 to 1 mm.
- PH15 pump head: Provides a single-channel flow range of 0.067 to 2240 ml/min, suitable for tubing sizes 19#, 16#, 25#, and 17#.
- Features a plug-card structure for quick and independent installation and removal, making tubing replacement easy and efficient.
- Multi-roller design** effectively reduces pulsation.
- Rollers are made of **high-strength stainless steel**, while the housing and card are constructed from PPS, offering high-temperature and chemical resistance.
- Bearing roller design** with adjustable gaps enhances flow consistency.
- Compatible with stepper motors, servo motors, AC gear motors, and DC gear motors.

## Technical Specifications of PH15 Series:

Parameters	PH15T	PH15T-6	PH15-24	PH15-44

# Pump Head

PH 6-4

Quick Tube Change

Stainless Steel Rotors

Moderate Pulsation

## Functions & Features:

- The Microlit PH series pump head is designed for **small-flow, multi-channel fluid transmission** and can simultaneously handle 1 to 48 channels in a compact, user-friendly design.
- Its precision structured design ensures **very low pulsation**, even compared to traditional multi-roller pump heads.
- The **well-engineered mechanical structure** and high-precision manufacturing technology ensure consistent flow across all channels.
- Features a card-type structure for independent loading and unloading, making tube replacement and securing quick and easy.
- Two types of card pressure devices are available: a **ratchet adjustment device** and an **adaptive spring device**. The adjustment card includes a shift display, allowing manual adjustment of tube clearance to fit various wall thicknesses and transmission pressures. The adaptive spring design automatically adjusts clearance based on tube thickness.
- Pump head rollers are made from **high-strength stainless steel**, with POM and PVDF high-performance plastics used in the card material to meet various operational requirements.
- Suitable for tubing with a wall thickness of 0.8 to 1 mm and an inner diameter of 0.13 to 3.17 mm, compatible with materials like silicone, Pharmed, PVC, Viton, and others. The single-channel flow range is 0.0001 to 49 ml/min.
- The pump head offers 6 rollers; the 6-roller head provides a broader flow range and extended tube life.
- Compatible with motors such as stepper motors, servo motors, AC gear motors, DC gear motors, and others operating at speeds below 100 RPM.

## Technical Specifications:

Channel	4
Rollers	6
Speed Range	≤100 RPM/min
Flow Range	≤50 ml/min
Tube Wall Thickness	0.8mm~1mm, ID:0.13mm~3.17mm
Pressure Tube Clearance	Automatic / Manual adjustment
Working Environment	Temperature 0 ~40°C , relative humidity < 80%
Motor	Stepper motor, Servo motor, AC gear motor, DC gear motor etc.

Note: After cascading the pump head, it can be expanded to 48 or more channels.

# Our Presence

## YOUR SATISFACTION IS OUR PRIORITY

Established in 1991, Microlit is one of the world's leading manufacturers & exporters of laboratory liquid handling instruments. Our product range includes micropipettes, bottle top dispensers, electronic burette, electronic pipette filling device and other micropipette accessories. With our patented products, innovative technologies & unfaltering trust of 8000+ consumers in 95+ countries, we are recognized as a respected & dependable brand in Healthcare and Lifesciences industry. Our offices are located in India (HQ), USA & Brazil. With a research-oriented & customer-centric team of product design engineers, our product design blends the best of functional performance & user experience. Our innovative products have helped us carve a niche in R&D industry while providing our users high level of precision & accuracy in their research work.
